No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                           Score

Patent No. US2001000639A1

GENERAL INFORMATION:
APPLICANT: Urban, Robert G.
APPLICANT: Chicz, Roman M.
APPLICANT: Collins, Edward J.
APPLICANT: Hedley, Mary Lynn
TITLE OF INVENTION: IMMUNOGENIC PEPTIDES FROM THE HPV E7
TITLE OF INVENTION: PROTEIN
NUMBER OF SEQUENCES: 33
CORRESPONDENCE ADDRESS:
ADDRESSEE: Fish & Richardson, P.C.
CTREEFET. 225 FRANCH: GTORAT
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                RESULT 1

Sequence 19, Application US/10890526

Publication No. US20040258708A1

GENERAL INFORMATION:

APPLICANT: Jochmus, Ingrid

APPLICANT: Jochmus, Ingrid

APPLICANT: Nieland, John

TITLE OF INVENTION: Cytotoxic T-Cell Epitopes of the

TITLE OF INVENTION: Papilloma Virus L1-Protein and Use Thereof in Diagnosis and

TITLE OF INVENTION: Therapy

FILE REFERENCE: 50125/036001

CURRENT APPLICATION NUMBER: US/10/890,526

CURRENT APPLICATION NUMBER: US/09/980,177

PRIOR FILING DATE: 2002-05-02

PRIOR APPLICATION NUMBER: DCT/EP00/05006

Sequence 206, Application US/10062710

Publication No. US20030049253A1

GENERAL INFORMATION:
APPLICANT: Li, Frank Q.
APPLICANT: Chu, Yong-Liang
APPLICANT: Chu, Yong-Liang
APPLICANT: Qiu, Jian-Tai

TITLE OF INVENTION: Polymeric Conjugates for Delivery of
TITLE OF INVENTION: MIC-Recognized Epitopes

TITLE OF INVENTION: Via Peptide Vaccines

FILE REFERENCE: 3781-001-27

CURRENT APPLICATION NUMBER: US/10/062,710

CURRENT APPLICATION NUMBER: US 60/310,498

PRIOR APPLICATION ADDIE: 2001-08-08

PRIOR APPLICATION ADDIE: 2001-08-08
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              APPLICANT: Barber, B.

TITLE OF INVENTION: Mixture of peptides derived from E6 and/or E7;
TITLE OF INVENTION: papillomavirus proteins and uses thereof
FILE REFERENCE: 45636-5071-US
CURRENT APPLICATION NUMBER: US/10/476,570
CURRENT FILING DATE: 2003-11-04
PRIOR APPLICATION NUMBER: PCT/FR02/01533
PRIOR FILING DATE: 2002-05-03
PRIOR APPLICATION NUMBER: FR 01 05980
PRIOR FILING DATE: 2001-05-04
NUMBER OF SEQ ID NOS: 63
SOFTWARE: Patentin Ver. 2.1
SEQ ID NO 57
LENGTH: 23
TYPE: PRT
ORGANISM: artificial sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ঠ
